Project Introduction

YOUR distributed system

If you remember the labs presentation...

- Submitting Prelab is mandatory
- You need 50% of the points
 - One lab is 10 points
 - Sometimes with bonus points
 - The optional project is worth 20 points
 - You get more than 30 points, you pass!

| Course week | Date | Day | Lecture | Book | Lab notes |
|-------------|--------|----------------|--|-------------------|---------------------------------------|
| 1 | 22.10. | Tuesday 14-16 | Introduction pdf video | Ch. 1 | PreLab open |
| | 24.10. | Thursday 10-12 | Communication pdf video | Ch. 4 | Lab intro & Lab 1 open |
| 2 | 29.10. | Tuesday 14-16 | Processes & Arch. pdf video | Ch. 2.1, 2.3, 3.1 | |
| | 31.10. | Thursday 10-12 | - (no lecture, no lab, Reformationstag) | - | PreLab due |
| 3 | 5.11. | Tuesday 14-16 | Mutual Exclusion, Election pdf video | Ch. 6.3, 6.4 | |
| | 7.11. | Thursday 10-12 | - (no lecture) | - | Lab 1 due, Lab 2 open |
| 4 | 12.11. | Tuesday 14-16 | Naming pdf video | Ch. 5 | |
| | 14.11. | Thursday 10-12 | Clock & Time I pdf video | Ch. 6.1 | |
| 5 | 19.11. | Tuesday 14-16 | Clock & Time II pdf video | Ch. 6.2 | |
| | 21.11. | Thursday 10-12 | Consistency & Rep. I pdf video | Ch. 7.1, 7.2 | Lab 2 due, Lab 3 open |
| 6 | 26.11. | Tuesday 14-16 | Consistency & Rep. II pdf video | Ch. 7.3, 7.4 | |
| | 28.11. | Thursday 10-12 | Consistency & Rep. III pdf video | Ch. 7.5, 7.6 | |
| 7 | 3.12. | Tuesday 14-16 | Fault Tolerance I pdf | Ch. 8.1, 8.2 | |
| | 5.12. | Thursday 10-12 | Fault Tolerance II | Ch. 8.3, 8.4 | Lab 3 due, Project Intro & Lab 4 open |
| 8 | 10.12. | Tuesday 14-16 | Fault Tolerance III | Ch. 8.4 - 8.6 | |
| | 12.12. | Thursday 10-12 | Applications I | - | |
| 9 | 17.12. | Tuesday 14-16 | Blockchain I | - | |
| | 19.12. | Thursday 10-12 | Present Project Ideas | - | Project Ideas Due |
| 10 | 7.1. | Tuesday 14-16 | Blockchain II | - | |
| | 9.1. | Thursday 10-12 | Blockchain III | - | Lab 4 due |
| 11 | 14.1. | Tuesday 14-16 | Applications II | - | |
| | 16.1. | Thursday 10-12 | Applications III | - | |
| 12 | 21.1. | Tuesday 14-16 | Paxos | - | |
| | 23.1. | Thursday 10-12 | Recap | - | Project Due |
| 13 | 28.1. | Tuesday 14-16 | Demos & Presentations | - | |
| | 30.1. | Thursday 10-12 | AMA | - | |

Goal

- Pick a topic in/related to the course
 - And make a small project from it
 - How much? Slightly more than a normal lab
- 20 points
 - Project idea and its presentation: 5 points
 - Project itself and final presentation: 15 points

Why

- Get experience in defining your tasks yourself
 - Estimate complexity, feasibility, and workload
- Key learning experience
 - For bachelor and master thesis
 - For projects
 - For real-life
 - You: Let's do the following
 - Boss: How long will it take?
 - You: One week.
 - *Two weeks later.* You: Boss, there is a problem...

Part 1: Project Idea

- Pick a topic, research it a bit
- Present it in the course (before Christmas)
 - 5 minutes, suggested: 4 slides max
 - Content
 - Motivation
 - Goal
 - Approach
 - Expected Result
 - For 5 points we do this, for 10 points we do this, for 15 points we do this...
 - You need to state these three milestones! They will be used for the final grade
 - Add challenging scenarios to make it worth 15 points!

Part 2: Project work

- Do the work (after Christmas break)
- Present it (10 to 15 min)
 - Motivation
 - Restate goals
 - Results (goals achieved)
 - Demo / Video
 - Approach
 - Lessons Learned
 - ...

Timeline

| Item | Date | Christmas break |
|--------------|------------------------------|-----------------|
| Project Idea | 19 th of December | Before! |
| Lab 4 | 9 th of January | After |
| Project | 23 rd of January | After |

Grading criteria

- Project proposal (5 points)
 - Presentation
 - Level of ambition (not too much, not too little)
- Project (15 points)
 - Quality
 - Presentation
 - Goals reached vs goals claimed
 - 5 points milestone, 10 points milestone, 15 points milestone?

Topic ideas

- Implement an algorithm of the lecture as part of the blackboard
 - Active replication (with Sequencer)
 - Quorum Protocol
 - Byzantine Generals: $n > 1$ dishonest nodes
 - Implement eventual consistency requirements: read-your writes when you switch replicas et.
 - Dining philosophers
 - 2PC, 3PC, Raft, Paxos...
 - ...
- Smart contracts in blockchain
 - Ethereum, Hyperledger etc.
- Play with Hadoop, Apache Spark, ...
- Your own topics and ideas are very welcome, too!!

More directions?

- Open Source stuff in Distributed Computing
 - <https://opensource.fb.com/#data>
 - <https://opensource.google.com/projects/list/cloud>
 - <https://github.com/rShetty/awesome-distributed-systems#opensource>
 - ...

Proposed topics are...

- ...Just hints!
 - Not specific on purpose
 - We want you to make your interpretation of the topic
 - Allows for multiple groups on similar topics
- Again, your own ideas are very welcome!
